Subregional VHF contest of July 2015

During the WE of July 4th and 5th, 2015, I have been partly taking part to the VHF subregional contest. Due to family and festive duties, I have only been active around 10 hours, mainly operating in DX S&P (“Searching & Pouncing”) mode. Just few CQ sessions at the end. Flat conditions around, except to the North-East where the signals were above normal but relatively few activity. Pity that the OZ stations usually worked during the NAC (“Nordic Activity Contest”) of Tuesday are not active at all during other contests. Surprised and pleased to easily work LA0BY (ODX 1125 km) and I5PVA/6. Very few activity in the South-East of France and less OK/OL’s than usual.
